Scope of the Journal

ISSN: 1744-1765 (Print), ISSN: 1744-1773 (Online)

Information and computer security are especially significant with the ubiquity of the internet and the rise of high-speed broadband networks. Information sharing among network users has caused countless invasions of privacy and security worldwide, with hackers demanding ransoms from organisations. This risk has generated enormous concern about security among internet users. IJICS is a double-blind refereed and authoritative reference which addresses information and computer security in computer/mobile networks. High-quality case studies, applications, novel ideas and survey papers are welcome.

Topics covered include:

- Cyber security, cloud security, blockchain security
- AI/machine learning in security, data mining in security
- Malware and botnet detection, virus/worm controls
- Computer crime prevention/detection, digital/cyber forensics and analysis
- Confidentiality protection, cryptography and data protection
- Information warfare, denial of service protection, spoofing protection
- e-Commerce security; image, audio and video security
- Android/iOS security, database and data security
- Information ethics, privacy issues, information security
- Social media abuse detection, intrusion detection and prevention, network security
- Risk management, safety-critical systems
- Secure communications technology and computer systems
- Security control measures, policy models and authentication
- Software and hardware security architectures
- Wireless/mobile network and data security
